

Children First

Social Plus Programme

Social Plus is a small class that supports your child to practice using spoken language appropriately with their friends in a fun, supportive and engaging setting. The class aims to improve foundation social skills, language levels and develop fundamental educational and play abilities for children with Autism Spectrum Disorder, ADHD, anxiety, sensory processing difficulties and more.

Social Plus Programme

Ages 3 – 5 years

Social Plus is led by an experienced Speech and Language Therapist and early years teacher, offering a low therapist/teacher to child ratio; thus allowing targeted support to be provided throughout the sessions. There will be no more than 6 children per class.

This class is ideal for children who require social stimulation and/or who would benefit from some support and strategies to increase their confidence and social skills.

It is an engaging class using role-playing, stories, themes, and fun activities to support and engage your child with practicing the following skills for them to use in their everyday world of home and school:

-  Social greetings
-  Awareness of others
-  Eye contact
-  Interaction with peers
-  Turn taking and waiting
-  Play skills

Feedback is given to parents each week to support your child's ongoing development.
